PROFESSIONAL SUMMARY

Full-Stack Developer with 2 years of experience specializing in MEAN Stack development (MongoDB, Express.js, Angular, Node.js) with strong expertise in authentication and authorization systems. Experienced in designing scalable RESTful APIs, implementing secure login systems, and developing role-based access control (RBAC) mechanisms. Proficient in JWT authentication, OAuth integrations, API security, middleware authorization, and secure password management using bcrypt. Skilled in MVC architecture, backend optimization, and building scalable web applications with a focus on performance, security, and maintainability.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++
Web Technologies: HTML, CSS, JavaScript
Frameworks & Stack: MEAN Stack (MongoDB, Express.js, Angular, Node.js)
Backend Development: RESTful APIs, MVC Architecture, Middleware Development, Microservice Concepts
Authentication & Security: JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), Password Hashing (bcrypt), Session Management, OTP Verification, API Security, Route Protection
Database: MongoDB
Tools & Platforms: Git, Postman, VS Code

PROFESSIONAL EXPERIENCE

Software Engineer – *Adamsbridge Services Private Limited*

Nov 2024 – Present

- Developed and maintained full-stack applications using MongoDB, Express.js, Angular, and Node.js.
- Designed and implemented secure authentication systems using JWT tokens and middleware authorization.
- Built RESTful APIs supporting user authentication, registration, password reset, and

account verification workflows.
- Implemented Role-Based Access Control (RBAC) to manage permissions for multiple user roles.
- Secured user credentials using bcrypt password hashing and implemented session management strategies.
- Integrated OAuth authentication providers to enable secure third-party login functionality.
- Implemented OTP verification and secure account recovery processes.
- Developed and tested APIs using Postman ensuring reliability and error handling.
- Collaborated with frontend developers to integrate authentication modules with Angular applications.
- Optimized backend APIs to improve response time and scalability for production environments.

INTERNSHIP EXPERIENCE

Project Trainee – Amzetta Technologies Pvt Ltd

Jun 2024 – Sept 2024

- Worked on development of MERN stack web applications.
- Assisted in creating backend APIs using Node.js and Express.js.
- Performed debugging, API testing, and performance improvements.
- Collaborated with senior developers to build scalable application components.

PROJECTS

- Designed and optimized RESTful APIs to ensure efficient frontend–backend communication, improving response speed and enhancing overall user experience.

- Developed a scalable chat application using Python and FastAPI, integrating LLM-based chatbot functionality via Ollama to deliver real-time, context-aware responses for multi-language programming queries (Java, Python, C++).

AI-Integrated Chat Application

Sentiment Analysis System for Education Feedback

- Developed a sentiment analysis application using Python to analyze student feedback.
- Generated automated reports to help educators evaluate teaching performance.
- Built a web interface using HTML and CSS to display analytical results.

Crop Price Prediction using Machine Learning

- Built a machine learning model using Python to predict agricultural crop prices.
- Enabled farmers to make better crop selection and selling decisions based on predictions.

EDUCATION

Bachelor of Computer Science Engineering
Dr. N.G.P Institute of Technology, Coimbatore
CGPA: 8.75 | 2020 – 2024

CERTIFICATIONS & ACHIEVEMENTS

NPTEL – Programming in Java (2023)
Paper Presentation – Sri Krishna College of Engineering (2022)
Workshop – Fundamentals of Drones (2023)
Seminar – Importance of Database in Real Time Applications (2022)
Great Learning – Java Programming (2021)
